**A CONFERENCE  
FUNDED BY THE  
EUROPEAN UNION**

Since climatic changes have started to affect people's daily life, the development of sustainable energies has become a newsworthy topic even in mass media. But how can renewable energy projects be funded? What are the economical and political frameworks?

Those and other related topics shall be presented and discussed by leading personalities from the energy business, politics and research institutions in a one week conference organized by the University of Applied Sciences Offenburg and the French National Institute for Applied Sciences in Strasbourg.
